SECTION 204 TRAFFIC SIGNS AND ROAD MARKINGS

Traffic signs **204.001** Traffic signs shall be in accordance with the Highways Agency Manual of Contract Documents Volume 1 (Specification for Highway Works), clauses 1201 to 1211, with the following amendments:

Delete “Appendix 12/1” and substitute “the Contract Drawings”.

Delete “Appendix 1/4” and substitute “the Contract Drawings”.

Delete “Appendix 12/6” and substitute “the Contract Drawings”.

Delete “Appendix 12/2” and substitute “the Contract Drawings”.

The location of traffic signs shall be as shown on the Contract Drawings.

At public vehicular level crossings, the locations and types of traffic signs shall be in accordance with the Agreed Final Installation Ground Plan for the level crossing.

The overall size of sign plates, including details of any light-spill screens and type of sign face material (including the class of any retro-reflective material), shall be as shown on the Contract Drawings.

Requirements for the type of material, preparation of finish, and for sign plates and posts shall be as shown on the Contract Drawings.

The type of direct illumination - whether internal or external, overhead mounted or upward pointing luminaires, and whether free standing on separate foundations - along with the luminance and impact categories of the signs and luminaires, shall be as shown on the Contract Drawings.

The method of switching the illumination (such as photo-electric control or time switch) shall be as shown on the Contract Drawings.

The number, type and size of posts for traffic signs, including details of any baseplates, flange plates, or electrical equipment compartments, shall be as shown on the Contract Drawings.

Sign foundations, including cable ducting reinstatement and any requirements for anchorages and attachment systems (including their loading and torque settings), shall be as shown on the Contract Drawings.
