WITHDRAWAL - Standards Briefing Note

Ref: NR/L3/INI/CP0065	**Issue:** 1
Title: Investment Projects, Enhancements – Engineering Management Plan	
Publication Date: 04/09/2010	**Withdrawal Date:** 02/06/2012
Standard Owner: Head of Systems Engineering, Investment Projects	
Non-Compliance rep (NRNC): Senior Engineer Investment Projects Enhancements Engineering	
Further information contact: Sue Perry	**Tel:** 085 33201

Purpose:

This document, an Engineering Management Plan (EMP), defined the engineering management roles and responsibilities within Investment Projects Enhancements (IPE) in accordance with the requirements of Company Standard, Engineering Management for Projects, NR/L2/INI/02009.

It provided Designated Project Engineers (DPE), Project Engineers (PE), Project Managers (PM) and others identified within the EMP clear direction regarding the engineering management arrangements and processes for all IPE Projects.

Scope:

The processes and arrangements described in the EMP were mandatory for all Projects undertaken within IPE.

When other Programmes within Investment Projects (IP) or delivery teams in Asset Management delivered works on behalf of IPE this EMP applied unless otherwise formally agreed by the IPE Senior Programme Engineering Manager (SPEM) prior to the commencement of the work.

The EMP applied whether the design for a Project was undertaken by Network Rail staff or by Suppliers contracted to Network Rail.

The EMP applied to Projects which also protected Network Rail's asset when a party other than Network Rail carries out work alongside, on, over or under Network Rail property unless otherwise varied by an approved asset protection agreement.

The EMP also applied when a third party carried out work on Network Rail's assets.

Exceptionally, a Programme Engineering Manager (PEM) could prepare an alternative EMP for a specific Project that is not suited to these arrangements. This must have been approved by the SPEM and authorised by the Senior Programme Manager (SPM) prior to the commencement of the work.

What's New/ What's Changed and Why:

As the April 2012 reorganisation will be geographically structured and aligned to the routes each Director will be responsible for the solution development, design and delivery of their own workbank. Each Director will therefore require their own Engineering Management Plan. As a result the IP(e) Engineering Management Plan (NR/L3/INI/CP0065) will no longer be applicable and will be withdrawn as a company standard.
