

PAN Register Notice

Information for users

The form:

NR/L3/INI/CP0074/F0030 Issue 12

has been issued on 25th August 2015.It contains full list of **Project Advice Notes**.

****NOTE 1:** Issue 9 of the PAN Register is current @ 25/08/2015. The PAN Register is updated (as required) on either a daily / weekly or monthly basis. It should be noted PANs listed on the Register are, predominantly, applicable to Infrastructure Projects. For clarification purposes where the expiry date on the Register is coloured red this does not mean that the PAN is longer applicable; the status of each PAN is identified in the Current Status column (i.e. the last column on the Register).

****NOTE 2:** Members of Infrastructure Projects should access the PAN Register via the IP IMS (IP IMS ref no. IP200). Should you encounter any issues with access to the PAN Register please send an e-mail to Elaine.Mortiboy-Clarke@networkrail.co.uk requesting a copy be provided.

****NOTE 3:** Supply chain members are advised that PANs are a vehicle for internal communication within Infrastructure Projects. The process for communicating emerging engineering instructions throughout the supply chain is the responsibility of Network Rail Commercial teams. Please note that if you are an external organisation the hyperlinks in the Title column of the PAN Register will not work.
