Compliance

This Network Rail standard is mandatory and shall be complied with by Network Rail and its contractors if applicable from 26 August 2008.

When this standard is implemented, it is permissible for all projects that have formally completed GRIP Stage 4 to continue to comply with the Issue of any relevant Network Rail Standards current when GRIP Stage 4 was reached and not to comply with requirements contained herein, unless the designated Standard Owner has stipulated otherwise in the accompanying Briefing Note.

1 Purpose

The purpose of this document is to define the roles and responsibilities in the planning of routine inspection and maintenance activities of Overhead Line Equipment (OLE) assets to fit in with the national planning process and timescales as described in NR/L2/MTC/0056 Specification for: Work and possession planning for the railway infrastructure (meetings management pack).

Changes to any plans shall be carried out in accordance with NR/SP/MTC/0086 Specification for: Work and possession planning for the railway infrastructure: Change Control.

OLE isolations shall be applied for and delivered in accordance with NR/L3/MTC/EP0107 Planning and delivery of OLE isolation.

2 Scope

This process covers the inspection and maintenance of Network Rail direct maintained OLE assets as defined in NR/L2/ELP/21087 Issue 3 Specification of maintenance frequency and defect prioritisation of 25kV overhead line electrification equipment as appropriate.

This process applies to you if:

- You manage or supervise OLE inspection or maintenance teams or technical support staff.
- You inspect or maintain OLE.
- You check or review OLE inspection or maintenance work.
- You are responsible for planning OLE inspection or maintenance.

SMP applies to:	Infrastructure Maintenance	Operational Property	Overhead Line Condition Renewals	Contractors
