Compliance

This Network Rail Standard is mandatory and shall be complied with by Network Rail and its contractors if applicable from 26 August 2008.

When this standard is implemented, it is permissible for all projects that have formally completed GRIP Stage 4 to continue to comply with the Issue of any relevant Network Rail Standards current when GRIP Stage 4 was reached and not to comply with requirements contained herein, unless the designated Standard Owner has stipulated otherwise in the accompanying Briefing Note.

1 Purpose

The purpose of this document is to define the process, roles and responsibilities for the inspection and surveillance of operational telecoms activities as laid out in company standard NR/L2/TEL/30033.

2 Scope

This process covers the inspection and surveillance of telecoms assets maintained or managed by Network Rail's own staff.

This process applies to you if:

- You manage or supervise operational teams or technical support staff or
- You manage or supervise telecoms operations.

For areas delivered by contract, the Telecoms Maintenance Engineer shall only carry out equipment checks to satisfy themselves that work is being delivered as per the contract.
