Train Operating Companies procedures

4.9.1 Rolling Stock Considerations

- 4.9.1.1 When considering any alterations to trains, Network Rail controllers must liaise with the relevant Train Operator controllers to ensure that traction and rolling stock considerations are taken into account.
- 4.9.1.2 These considerations may include fuel requirements, route availability, maintenance and repairs, and route availability.
- 4.9.1.3 Controllers shall ensure that short notice changes to the booked CWN are issued and advised to the relevant signal boxes in accordance with the Route Code of Practice.
