Compliance

This Network Rail standard is mandatory and shall be complied with by Network Rail and its contractors if applicable from 06/06/2015.

When this standard is implemented, it is permissible for all projects that have formally completed GRIP Stage 3 (Option Selection) to continue to comply with the Issue of any relevant Network Rail Standards current when GRIP Stage 3 was reached and not to comply with requirements contained herein, unless stipulated otherwise in the scope of this standard.

Scope

The drawings listed may in some cases not be compliant with the requirements of Railway Group Standards, Company Standards or Legislation brought into force at a date later than the issue date of the drawings. Warnings have been appended to the drawing description where these instances have been identified.

Where a drawing is unsuitable for use on a particular project, that project should arrange to update the original drawing. Authority to update drawings must be obtained from the Network Rail Professional Head of Signal Engineering.
