Issue record

Issue	Date	Comments
1	April 2006	First issue
2	August 2008	Amended responsibilities to reflect the business after the 2A re-organisation
3	September 2011	Maintenance of document, no change to requirements (CCMS document number 61384207)

Compliance

This Network Rail standard is mandatory and shall be complied with by Network Rail and its contractors if applicable from 03/09/2011.

When this standard is implemented, it is permissible for all projects that have formally completed GRIP Stage 3 (Option Selection) to continue to comply with the issue of any relevant Network Rail standards current when GRIP Stage 3 was completed and not to comply with requirements contained herein, unless stipulated otherwise in the scope of this standard.

1 Purpose

This standard details the roles and responsibilities in the planning of all routine preventative maintenance activities on signalling assets to fit in with the national planning process and timescales as detailed in [NR/L2/MTC/0056](#).

2 Scope

This standard does not cover personal safety requirements.

This standard is for the preventative maintenance of Network Rail direct maintained signalling assets. Assets that are owned by another function but have preventative maintenance undertaken by signalling (e.g. Hot Axle Bearing Detectors) are also covered.

It does not cover the maintenance of tools or equipment used to maintain signalling equipment.

This standard applies to you if you are involved with the management and delivery of preventative maintenance on signalling equipment. Individual role/position responsibilities for this procedure are detailed in the RACI.

This standard does not cover corrective maintenance, this is detailed in [NR/L3/SIG/SG0054](#).
