

Lineside Facilities For Personal Safety– Maintenance, Repair And Renewal

Scope

Includes: All vehicle and pedestrian access points listed in the Hazard Directory, authorised walking routes, cess walkways and positions of safety

Excludes: Protection systems (eg TOWS), safe systems of working and track access points (ie built up units such as TAP or RRAP)

Preparation

Tools, equipment and plant items required but not limited to:

- Those appropriate for the task to be undertaken
- Banding equipment if material is not to be removed immediately

Work planning considerations:

- Weather precautions
- Access over 3rd party land
- Storage and transport of materials
- Closure of access point, alternative access arrangements
- Closure of walkway, alternative arrangements

Method

1. Scan area using suitable equipment if any digging is required
2. Remove vegetation and prepare site
3. Repair/replace/install access, position of safety or walkway in accordance with NR/SP/OHS/069 Lineside facilities for personal safety and site specific drawings
4. Ensure integrity of boundary is maintained during any works
5. Secure any redundant material which is not removed immediately.
6. Install/replace any signage required
7. Ensure access is secured with appropriate lock on completion of work.
8. Remove scrap, waste and surplus materials and tidy site
