Summary

This code of practice summarises a range of general issues relating to Treadles on Railtrack's Signalling Infrastructure.

Issue/Revision Record

This code of practice will be updated when necessary by the distribution of a complete document. Subsequent amendments will be marked by vertical black line in the adjacent right hand margin.

Issue	Date	Comments
1	Feb 2001	Original Issue

Implementation

This code of practice highlights issues arising from operational experience, concerning the installation and maintenance of signalling equipment. Where appropriate, it gives current best practice for mitigating risk and is for implementation from 2 Jun 2001. Alternative practices may be accepted where they can be demonstrated to be as good or better than the contents of this document.

Superseded document reference number	Issue	Date

1. PURPOSE

This document provides a record of best practice general information relating to Treadles used on Railtrack Signalling Infrastructure, together with relevant technical information and where appropriate, related historical background.

2. SCOPE

This document covers Treadles and associated equipment in use on Railtrack Signalling Infrastructure.

3. REFERENCES

TQ52	Treadles, Forfex Pattern (Double Arm)

4. TESTING

The last operation of all maintenance services is to test by operation and to observe that the apparatus functions correctly.

5. PERSONAL SAFETY

All appropriate safety precautions must be observed when undertaking the work covered by this document.

This document does not address general personal safety measures. Local instructions including a COSHH assessment may be in operation and these will highlight those measures which must be taken to control any Health and Safety concerns.
