CORE MAINTENANCE SPECIFICATION FOR
POWERED SCRUBBER/SWEEPER

I. INTRODUCTION

I.1 Purpose

This document is the Technical Specification for the maintenance of Powered Scrubber/Sweepers. The document is to be read in conjunction with the relevant Contract Documentation.

I.2 Scope

This Specification details the requirements for the minimum maintenance attention to any Railtrack Powered Scrubber/Sweeper.

I.3 Definitions

<u>Competent Person</u>	A person who has such practical and theoretical knowledge and actual experience of the type of equipment as will enable them to detect defects which it is the purpose of the examination to discover.
-------------------------	--

<u>User/Operator</u>	A person using/operating the plant/equipment.
----------------------	---

2. GENERAL

2.1 Specific Documentation

Core Maintenance Specifications apply to many items of Plant of a similar but not identical nature.

The person responsible for routine maintenance shall produce Data Extracts and Records of Drawings and Manuals for individual items of Plant for inclusion in contract documentation. Specimen forms are included in Section 4.

Maintenance tasks listed in the Plant Maintenance Instruction (Section 5) shall only be deleted if they refer to components and sub-systems that are not present on the specific item of plant being considered.

Where the Plant Maintenance Instruction does not adequately cater for particular features, components and sub-systems, further maintenance tasks shall be added using the same layout and terminology and with due consideration to periodicities.

2.2 Requirements

The periodicities of the maintenance tasks specified in the Plant Maintenance Instruction (Section 5) are the minimum requirement. The Maintenance Contractor must be satisfied that after carrying out each check and subsequent action/s the components will perform satisfactorily until the next examination. If not then action must be taken to ensure their satisfactory performance, or the frequency of examination increased as appropriate.

2.3 Procedures

The Maintenance Contractor must have, and follow, a procedure for carrying out the maintenance of each installation in accordance with this document. This procedure must incorporate the following stages:

- 1 Check all relevant components and systems for condition and security and measure all parameters for conformance with the stated limits as required.
- 2 Record the condition and parameters.
- 3 Decide on appropriate action, record decision and reason.
- 4 Take appropriate action.
