Disclaimers¹

NSF, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party. The opinions and findings of NSF represent its professional judgment. NSF shall not be responsible to anyone for the use of or reliance upon this Standard by anyone. NSF shall not incur any obligation or liability for damages, including consequential damages, arising out of or in connection with the use, interpretation of, or reliance upon this Standard.

NSF Standards provide basic criteria to promote sanitation and protection of the public health. Provisions for mechanical and electrical safety have not been included in this Standard because governmental agencies or other national standards-setting organizations provide safety requirements.

Participation in NSF Standards development activities by regulatory agency representatives (federal, local, state) shall not constitute their agency's endorsement of NSF or any of its Standards.

Preference is given to the use of performance criteria measurable by examination or testing in NSF Standards development when such performance criteria may reasonably be used in lieu of design, materials, or construction criteria.

The illustrations, if provided, are intended to assist in understanding their adjacent standard requirements. However, the illustrations may not include **all** requirements for a specific product or unit, nor do they show the only method of fabricating such arrangements. Such partial drawings shall not be used to justify improper or incomplete design and construction.

Unless otherwise referenced, the annexes are not considered an integral part of NSF Standards. The annexes are provided as general guidelines to the manufacturer, regulatory agency, user, or certifying organization.

¹ The information contained in this Disclaimer is not part of this American National Standard (ANS) and has not been processed in accordance with ANSI's requirements for an ANS. As such, this Disclaimer may contain material that has not been subjected to public review of a consensus process. In addition, it does not contain requirements necessary for conformance to the Standard.

Contents

Foreword	vii
1 General	1
1.1 Purpose	1
1.2 Scope	1
1.3 Alternate materials, design, and construction	1
2 Normative references	1
3 Definitions	1
4 Materials	2
4.1 Water contact surfaces	2
4.2 External surfaces	2
4.3 Intermediate transfer media	2
5 Design and construction	2
5.1 General sanitation	3
5.2 Equipment mounting	3
5.3 Legs and feet	3
5.4 Temperature regulators	3
5.5 Recirculation systems	3
5.6 Backflow and cross-connection protection	3
5.7 Louvers	4
6 Performance	4
6.1 Recovery rate verification	4
6.2 Temperature regulation	5
7 Installation, operation, and maintenance instructions	5
Annexes	
A Installation recommendations (informative)	A1
A.1 General	A1
A.2 Qualifications of installer	A1
A.3 Location and piping	A1
A.4 Water piping materials	A1
A.5 Water supply lines	A1
A.6 Water supply pressure control	A1
A.7 Dual heater installations	A2
A.8 Booster pumps	A2
A.9 Safety measures	A2
A.10 General purpose water	A2
A.11 Recirculation by gravity	A2
A.12 Recirculation by pump	A2
A.13 Insulation	A3
A.14 Testing	A3
Figure A1 – Recirculation by gravity	A4
B Technical information (informative)	B1
B.1 Sizing water heaters for dishwashing machines	B1
B.2 Storage type water heaters	B2
