Committees responsible for this Published Document

The preparation of this Published Document was entrusted to Technical Committee ISE/71, Steel rod for wire drawing, upon which the following bodies were represented:

- Process Plant Association
- UK Steel Association
- Welding Manufacturers' Association (BEAMA Ltd.)

This Published Document, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 March 1999

Contents

	Page
Committees responsible	Inside front cover
Foreword	iii
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 heat analysis	1
3.2 product analysis	1
4 Classification and designation	1
4.1 Classification	1
4.2 Designation	1
5 Production process	2
6 Common requirements	2
6.1 General	2
6.2 Internal soundness and surface quality for all types of rod	2
6.3 Inspection of non-metallic inclusions	2
6.4 Method of delivery	2
6.5 Delivery condition	2
7 Requirements for general purpose rod	2
7.1 Chemical composition and mechanical properties	2
7.2 Depth of surface defects and soundness	2
7.3 Core segregation	2
8 Requirements for rimmed and rimmed-substitute low-carbon steel rod	2
8.1 Chemical composition and mechanical properties	2
8.2 Depth of surface defects and soundness	2
9 Requirements for rod for special applications	2
9.1 Chemical composition and mechanical properties	2
9.2 Depth of surface defects and soundness	2
9.3 Core segregation	3
9.4 Depth of decarburization	3
10 Dimensions, mass and tolerances	3
11 Inspection and testing	3
11.1 Inspection and inspection documents	3
11.2 Extent of inspection	3
11.3 Acceptance unit and number of samples and test pieces	3
11.4 Test of chemical composition	3
11.5 Test of decarburization, surface defects, non-metallic inclusions and core segregation	3
11.6 Test methods	3
12 Marking	3
Annex A (normative) Determination of core segregation	9
A.1 Scope	9
A.2 Definition	9
A.3 Principle	9
A.4 Preparation of samples	9
A.5 Evaluation of the segregation	9
Annex B (informative) Information to be supplied by the purchaser	11

Tables

1	Chemical analysis (heat analysis) for general purpose rod	4
2	Chemical analysis (heat analysis) for rimmed and rimmed-substitute low carbon	5
3	Chemical analysis (heat analysis) for rod special applications	5
4	Permissible deviations in the product analysis in relation to the actual heat analysis for general purpose rod	5
5	Mechanical properties for general purpose rod and rod for special applications	5
6	Limit values for the depth of surface discontinuities for general purpose rod	6
7	Permissible deviations in the product analysis in relation to the actual heat analysis for rimmed and rimmed-substitute low-carbon steel rod	6
8	Tensile strength values for rimmed and rimmed-substitute low carbon steel rod	6
9	Limit values for the depth of surface discontinuities for rimmed and rimmed-substitute low-carbon steel rod	6
10	Permissible deviations in the product analysis in relation to the actual heat analysis for rod for special applications	7
11	Limit values for the depth of surface discontinuities for rod for special applications	7
12	Limit of the depth of partial decarburization	7
13	Extent of inspection	7
14	Acceptance unit and number of samples and test pieces	8

Foreword

This Published Document has been prepared by Technical Committee ISE/71. It is derived from BS EN 10016 Parts 1-4, with the data being presented in a single document, and with the addition of mechanical properties. The publication of this PD is necessary because UK practice in the steel wire industry differs from that in the rest of Europe; particularly the practice of specifying mechanical properties rather than chemical composition. It is anticipated that the publication of this PD will assist in the preparation of the UK view for the revision of EN 10016.

Compliance with a Published Document does not itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i to iv, pages 1 to 11 and a back cover.
