TELECOMMUNICATIONS ACT 1984 (C 12)

Designation under section 22(6) of a Standard specifying technical requirements for terminal equipment intended for connection to the Extended Total Access Communications System (ETACS).

DESIGNATION NO. 95/037 NTR 13

1) The Secretary of State, having consulted in accordance with section 22(8), hereby designates, under section 22(6) of the Telecommunications Act 1984 ("the Act"), the document identified in Annex 1 as the standard to which apparatus falling within the scope of that document must conform if it is to be approved for connection to any public telecommunication system within the meaning of the Act. The standard shall apply to approvals under section 22 of the Act for the purposes of licences granted under section 7 of the Act.

2) This designation applies to all terminal equipment intended for connection to the Extended Total Access Communications System, irrespective of whether the terminal equipment provides additional interfaces, telecommunications services or functions.

3) Apparatus may be approved for connection even though it does not comply with all the requirements above where the person giving such approval is satisfied that:

a) it is connected at a particular place specified in accordance with the terms of an approval under section 22(1) of the Act; or

b) it is apparatus specially designed or adapted for disabled people; or

c) any deviation from the standard, including agreed and recognised use of equivalent standards and tests in any member state of the European Economic Area, is such that the essential requirements for telecommunication terminal equipment given in European Community Directives are satisfied; and the apparatus could not reasonably be foreseen to give rise to a risk of death or injury to any person or animal, or damage to property, or material impairment of the quality of any public telecommunication service; or

d) for approvals given before 31 December 1996, the equipment would have met the requirements for approval in force at the date of this designation, or any subsequent modification thereof;

and any such exception shall be dealt with in a transparent manner and on the basis of objective criteria.

Date.....14/12/95

Foreword

This Published Document has been prepared under the direction of the Telecommunications Standards Policy Committee (TCT/-) and at the request of the DTI Telecommunications and Posts Division. Any enquiries relating to this document should be directed to BSI quoting the committee reference TCT/-/2/2, which was involved in the preparation of this document.

This Published Document forms one of a series of Published Documents that are being produced to record the essential requirements, consistent with Directive 91/263/EEC, for the connection of apparatus to the various public telecommunication systems (i.e. designated as a public telecommunications system by an order made under Section 9 of the Telecommunications Act 1984).

The requirements specified in this Published Document were drawn from the following document

Reference number	Title	Published by
STATE/TACS94.1	<i>Specification for the type approval of terminal equipment for use in the Total Access Communications System (TACS)</i>	BABT

This Published Document is presented for designation under Section 22 of the Telecommunications Act 1984.

The document is submitted to the DTI for designation as the National Technical Requirement for the approval of the equipment defined in the scope.

A copy of any designation will be included when available with all copies of this Published Document. Any further information on, or details of, the designation may be obtained from the Office of Telecommunications (OFTEL), 50 Ludgate Hill, London EC4M 7JJ.

BSI waives copyright in respect of Annex B.

Attention is drawn to the Telecommunications Act 1984.

Summary of pages

This document comprises a front cover, an inside front cover, pages i to vi, pages 1 to 14, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
