Committees responsible for this Published Document

The preparation of this Published Document was entrusted to Technical Committee PVE/15, Site built tanks for the petroleum industry, upon which the following bodies were represented:

- Aluminium Federation
- British Chemical Engineering Contractors' Association
- British Compressed Gases Association
- BG Technology
- Concrete Society
- Energy Industries Council
- Engineering Equipment and Materials Users' Association
- HSE
- Independent Tank Storage Association
- Institution of Mechanical Engineers
- Process Plant Association
- UK Steel Association
- Welding Institute

This Published Document, having been prepared under the direction of the Engineering Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 May 2000

Committees responsible	Inside front cover
Foreword	ii
Introduction	1
1 Scope	1
2 Normative references	1
3 Materials	1
4 Design and manufacture	2
Bibliography	Inside back cover
Table 1 — Suitable steels	4
Table 2 — Longitudinal Charpy V-notch impact test requirements	5
Table 3 — Required nil-ductility transition temperatures and minimum test temperatures for no-break results	5
Table 4 — Dropweight specimen type	5
Figure 1 — Schematic longitudinal section through HAZ dropweight test specimen with high Ni weld metal	3

Foreword

This Published Document has been prepared by Technical Committee PVE/15, Site built tanks for the petroleum industry.

It should be used in conjunction with BS 7777:1993.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for their correct application.

This Published Document is not to be regarded as a British Standard.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.
