Energy performance of buildings — Controls for heating systems

Part 7: Accompanying TR EN 12098-3:2022 — Modules M3-5,6,7,8

National foreword

This Published Document is the UK implementation of CEN/TR 12098-7:2022. Together with PD CEN/TR 12098-6:2022, it supersedes PD CEN/TR 12098-7:2016 and PD CEN/TR 12098-8:2016, which are withdrawn.

The UK participation in its preparation was entrusted to Technical Committee RHE/16, Performance requirements for control systems.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

European foreword

This document (CEN/TR 12098-7:2022) has been prepared by Technical Committee CEN/TC 247 “Building Automation, Controls and Building Management”, the secretariat of which is held by SNV.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes CEN/TR 12098-7:2016 and CEN/TR 12098-8:2016.

CEN/TR 12098-7:2022 includes the following significant technical changes with respect to CEN/TR 12098-7:2016:

- respecting the presentation of this project in the frame EPB in accordance with the drafting rules;
- improvements in line with EN 12098-5:2017.

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

Introduction

This document is part of the set of EPB (Energy Performance of Building) standards that aim to support the implementation of the Energy Performance of Buildings Directive (EPBD). This document contains informative contents for users to properly understand, apply and nationally adapt the EPB standards.

This document follows the basic principles (CEN/TS 16628, *Energy Performance of Buildings — Basic Principles for the set of EPB standards*) and detailed technical rules (CEN/TS 16629, *Energy Performance of Buildings — Detailed Technical Rules for the set of EPB-standards*) elaborated by CEN.

The detailed technical rules of CEN/TS 16629 ask for a clear separation between normative and informative contents:

- to avoid flooding and confusing the actual normative part with informative content;
- to reduce the page count of the actual standard;
- to facilitate understanding of the package.

Therefore, each EPB standard should be accompanied by an informative technical report, like this one, where all informative content is collected.

Table 1 shows the relative position of this document within the EPB set of standards.
