

Survey of European Standards for rehabilitation of drain and sewer systems

ICS 93.030

National foreword

This Published Document is the official English language version of CEN/TR 15128:2005.

The UK participation in its preparation was entrusted by Technical Committee B/505, Wastewater engineering, to Subcommittee B/505/1/P4, Survey of European Standards for rehabilitation of drain and sewer systems, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a Published Document does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the PD CEN/TR title page, pages 2 to 14, an inside back cover and a back cover.

Survey of European Standards for rehabilitation of drain and sewer systems

Aperçu des Normes européennes pour la réhabilitation des réseaux d'évacuation et d'assainissement

Übersicht über Europäische Normen für die Sanierung von Entwässerungssystemen

This Technical Report was approved by CEN on 24 April 2005. It has been drawn up by the Technical Committee CEN/TC 165.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (CEN/TR 15128:2005) has been prepared by Technical Committee CEN/TC 165 "Wastewater engineering", the secretariat of which is held by DIN.

CEN/TC 165 having determined the current status of European standardization regarding general requirements for drain and sewer systems and existing standards and draft standards on the subject of rehabilitation of drain and sewer systems, and CEN/TC 165 having considered the results of an enquiry submitted by EUREAU on the status of European Standards in the field of rehabilitation of drain and sewer systems, it was established that those were not sufficiently known.

It was agreed that information of the status of European standard work in this area was greatly needed.

Therefore, CEN/TC 165 decided to make this information in summary form available with the aid of an informative CEN document in the form of a CEN/TR and, if necessary, to give the necessary explanations.

Standards produced by the following Technical Committees are included in this document:

CEN/TC 155 "Plastics piping systems and ducting systems";

CEN/TC 164 "Water supply";

CEN/TC 165 "Wastewater engineering".

Because European manufacturers have disbanded the production of fibre cement pipes and fittings for drain and sewer systems, European Standards in that field are not included in this document.

1 Scope

This document gives a survey of European Standards available in the field of rehabilitation of drain and sewer systems.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE Since Clause 5 refers to European Standards with their complete title they are not repeated here.

EN 476, *General requirements for components used in discharge pipes, drains and sewers for gravity systems*

EN 773, *General requirements for components used in hydraulically pressurized discharge pipes, drains and sewers*

EN 805, *Water supply - Requirements for systems and components outside buildings*

EN 1610, *Construction and testing of drains and sewers*

prEN 14801, *Conditions for pressure classification of products for water and waste water pipelines*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

rehabilitation

all measures for restoring or upgrading the performance of existing drain and sewer systems
[EN 752-1:1995]

3.2

renovation

work incorporating all or part of the original fabric of the drain or sewer by means of which its current performance is improved
[EN 752-5:1995]

3.3

repair

rectification of local damage
[EN 752-5:1995]

3.4

replacement

construction of a new drain or sewer, on or off the line of an existing drain or sewer

3.5

"M" stage

stage as manufactured, before any subsequent site processing of components associated with a particular repair or renovation technique
[EN 13380:2001]
