

BSI Standards Publication

Shunt capacitors for a.c. power systems having a rated voltage above 1 000 V

Part 2: Endurance testing

National foreword

This Published Document is the UK implementation of IEC TS 60871-2:2014, incorporating amendment 1:2022. It supersedes BS 7264-2:1990, which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags. Tags indicating changes to IEC text carry the number of the IEC amendment. For example, text altered by IEC amendment 1 is indicated by **A1** **A1**.

The UK participation in its preparation was entrusted to Technical Committee W/-, Consumer Products and Services Sector Policy and Strategy Committee.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

CONTENTS

FOREWORD	4
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Quality requirements and tests	7
4.1 Test requirements – General purpose	7
4.2 Test procedure.....	7
4.2.1 General	7
4.2.2 Routine test	7
4.2.3 Conditioning of the units before the test.....	7
4.3 Ageing test	7
4.3.1 Initial capacitance and dielectric loss measurements	7
4.3.2 Final capacitance and dielectric loss measurements	8
4.3.3 Acceptance criteria	8
4.4 Validity of test	8
5 Element fail safe test for fuseless capacitors	8
5.1 General.....	8
5.2 Test unit	9
5.2.1 General	9
5.2.2 Set-up of the test unit, first method	9
5.2.3 Set-up of the test unit, second method.....	9
5.2.4 Active element for the low energy test	9
5.2.5 Active element for the high energy test	10
5.3 Conditioning of the unit	10
5.3.1 General	10
5.3.2 Circuit for achieving a failed test unit, first method.....	10
5.3.3 Circuit for achieving a failed test unit, second method	11
5.3.4 Failure of the unit for the low energy test.....	11
5.3.5 Failure of the unit for the high energy test.....	12
5.4 Test procedure.....	12
5.4.1 General	12
5.4.2 Discharge test	12
5.4.3 Load current test	12
5.4.4 AC voltage test between terminals and container.....	13
5.5 Success criteria	13
Annex A (normative) Requirements regarding comparable element design and test unit design	14
A.1 Test element design criteria	14
A.2 Test unit design	14
Annex B (informative) Definition of element and capacitor container dimensions.....	16
B.1 Flattened pressed element.....	16
B.2 Capacitor container.....	16
Figure 1 – Puncture location on the active element	10
Figure 2 – Electric circuit for conditioning of the units	11

Figure 3 – Electric circuit for the discharge test.....	12
Figure 4 – Electric circuit for the load current test	13

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SHUNT CAPACITORS FOR AC POWER SYSTEMS HAVING A RATED VOLTAGE ABOVE 1 000 V –

Part 2: Endurance testing

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.
