

BSI Standards Publication

IEC 63126:2020/CR1:2022 Guidelines for qualifying PV modules, components and materials for operation at high temperatures

National foreword

This Published Document is the UK implementation of IEC TS 63126:2020 incorporating corrigendum September 2022.

The UK participation in its preparation was entrusted to Technical Committee GEL/82, Photovoltaic Energy Systems.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	8
4 Modifications to IEC 61215-2.....	9
4.1 General.....	9
4.2 Hot-spot endurance test (MQT 09).....	9
4.3 UV preconditioning test (MQT 10).....	9
4.4 Thermal cycling test (MQT 11).....	9
4.5 Bypass diode testing (MQT 18).....	9
5 Modifications to IEC 61730.....	10
5.1 IEC 61730-1	10
5.2 IEC 61730-2	10
5.2.1 General	10
5.2.2 Hot spot endurance test (MST 22)	10
5.2.3 Bypass diode thermal test (MST 25).....	10
5.2.4 Materials creep test (MST 37).....	10
5.2.5 Thermal cycling test (MST 51).....	11
5.2.6 UV test (MST 54).....	11
5.2.7 Dry heat conditioning (MST 56)	11
6 Modifications to component standards	11
6.1 Polymeric packaging material testing requirements.....	11
6.1.1 Test procedures for durability of polymer packaging materials	11
6.1.2 Polymeric back sheets and front sheets	11
6.2 Junction boxes according to IEC 62790	11
6.3 Connectors for DC application in photovoltaic systems according to IEC 62852.....	12
6.4 Electric cables for photovoltaic systems with a voltage rating of 1,5 KV DC according to IEC 62930.....	12
7 Test modification summary	12
8 Reporting.....	12
Annex A (informative) Determination of temperature level.....	13
A.1 General.....	13
A.2 Modelling	13
A.3 98 th -percentile temperatures (T_{98th}).....	14
A.4 Guidance on module temperature for several locations	15
Bibliography.....	18
Figure A.1 – Histogram and CDF of module temperature for Riyadh, Saudi Arabia.....	15
Figure A.2 – Time series from the model for Riyadh.....	15
Figure A.3 – 98 th -percentile temperature for an open-rack, or thermally unrestricted, glass superstrate, polymer backsheet module.....	16

Figure A.4 – 98 th -percentile temperature for a close-roof mounted glass superstrate, polymer backsheets module	16
Figure A.5 – 98 th -percentile temperature for insulated-back glass superstrate, polymer backsheets module	17

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**GUIDELINES FOR QUALIFYING PV MODULES, COMPONENTS
AND MATERIALS FOR OPERATION AT HIGH TEMPERATURES**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. In exceptional circumstances, a technical committee may propose the publication of a Technical Specification when

- the required support cannot be obtained for the publication of an International Standard, despite repeated efforts, or
- the subject is still under technical development or where, for any other reason, there is the future but no immediate possibility of an agreement on an International Standard.

Technical Specifications are subject to review within three years of publication to decide whether they can be transformed into International Standards.

IEC TS 63126, which is a Technical Specification, has been prepared by IEC technical committee 82: Solar photovoltaic energy systems.

The text of this Technical Specification is based on the following documents:

Draft TS	Report on voting
82/1662/DTS	82/1706A/RVDTS

Full information on the voting for the approval of this Technical Specification can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- transformed into an International standard,
- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

The contents of the corrigendum 1 (2022-09) have been included in this copy.
