

BSI Standards Publication

Information technology — Cross jurisdictional and societal aspects of implementation of biometric technologies — Biometrics and elderly people

National foreword

This Published Document is the UK implementation of ISO/IEC TR 20322:2023.

The UK participation in its preparation was entrusted to Technical Committee IST/44, Biometrics.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	1
5 Fundamental concepts	1
6 Elderly people in terms of age	2
7 Critical points associated to the use of specific biometric modalities by elderly people	2
7.1 General considerations.....	2
7.2 Fingerprint recognition.....	2
7.2.1 Typical characteristics of an elderly person which can have consequences on fingerprint recognition: skin conditions.....	2
7.2.2 Typical pathologies experienced by elderly people which can have consequences on fingerprint recognition.....	3
7.2.3 Data concerning the use of fingerprint recognition by elderly people.....	4
7.3 Face recognition.....	4
7.3.1 Typical characteristics of elderly people which can have consequences on face recognition.....	4
7.3.2 Typical pathologies experienced by elderly people which can have consequences on fingerprint recognition: neuromuscular problems.....	4
7.3.3 Data concerning the use of face recognition by elderly people.....	4
7.4 Iris recognition.....	5
7.4.1 Typical characteristics or pathologies of an elderly person which can have consequences on iris recognition.....	5
7.4.2 Data concerning the use of iris recognition by elderly people.....	6
8 Critical points which affect multiple modalities	6
9 Practical issues involved in the implementation of biometric systems used by elderly people	6
9.1 Cognitive challenges.....	6
9.2 Acceptance of biometrics in the elderly people population.....	7
10 Conclusions	7
Bibliography	8

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <https://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 37, *Biometrics*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.
