

BSI Standards Publication

Intelligent transport systems (ITS) — Communications — ITS communication role and functional model

National foreword

This Published Document is the UK implementation of ISO/TR 17732:2024.

The UK participation in its preparation was entrusted to Technical Committee EPL/278, Intelligent transport systems.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This publication is not to be regarded as a British Standard.

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	1
5 ITS communication functions	1
5.1 General	1
5.2 Cyber security in ITS application services	2
5.3 Moving data between actors	2
5.4 Connected vehicle/device environment	2
5.4.1 General	2
5.4.2 Low latency	2
5.4.3 Multi-device access capability	2
5.4.4 Network slicing	2
5.4.5 Carrier aggregation	3
5.4.6 Propagation speed difference between wired and wireless environments	3
5.4.7 Radio frequency spectrum sharing	3
5.4.8 Open radio access network	3
5.4.9 Cloud network	3
6 Role and function model	3
6.1 Objective	3
6.2 National variations	3
6.3 Basic role model architecture	4
6.3.1 General	4
6.3.2 Smart city sensor data (probe data)	4
6.3.3 3D HD map	4
6.3.4 Digital infrastructure	4
6.3.5 Mobility supporting facility	5
6.3.6 Physical infrastructure platform	5
6.3.7 ITS service providers	5
6.3.8 Communication (communication service provider)	5
6.3.9 Mobility users	5
6.4 Application layer role and functional model for ITS application service	5
6.4.1 General	5
6.4.2 Role and functional model options	6
6.4.3 Certification of service providers	6
6.5 ITS service role and functional model	6
Bibliography	8

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 204, *Intelligent transport systems*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
