

SUGGESTED TEMPERATURE LIMITS FOR THE OPERATION AND INSTALLATION OF PLASTIC PIPING IN NON-PRESSURE APPLICATIONS

TN-11

2021

Foreword

This technical note was developed and published with the technical help and financial support of the members of the Plastics Pipe Institute (PPI). These members have shown their commitment to developing and improving quality products by assisting standards development organizations in the development of standards, and also by developing design aids and reports to help engineers, code officials, specifying groups, contractors and users.

The purpose of this technical note is to provide suggested temperature limits for the operation and installation of plastic piping in non-pressure applications.

The PPI has prepared this technical note as a service to the industry. The information in this note is offered in good faith and believed to be accurate at the time of its preparation, but is offered “as is” without any express or implied warranty, including WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Additional information may be needed in some areas, especially with regard to unusual or special applications. Consult the manufacturer or material supplier for more detailed information. A list of member manufacturers is available on the PPI website. PPI does not endorse the proprietary products or processes of any manufacturer and assumes no responsibility for compliance with applicable laws and regulations.

PPI intends to revise this technical note within five years, or sooner if required, from the date of its publication, in response to comments and suggestions from users of the document. Please send suggestions of improvements to the address below. Information on other publications can be obtained by contacting PPI directly or visiting our website.

Table of Contents

1.0	INTRODUCTION.....	1
2.0	PRESSURE VS. NON-PRESSURE APPLICATIONS.....	1
2.1.	Definition of Non-Pressure Service.....	1
2.2.	Rationale for use in Non-pressure Applications	1
2.3.	Information on Pressure Service.....	2
3.0	PLASTIC PIPE IN NON-PRESSURE SERVICE.....	2
3.1.	Chemical Compatibility	2
3.2.	Effects of High-Temperature Exposure.....	2
3.3.	Impact of Insulating Properties of Plastic Materials.....	3
3.4.	Above Ground Installations.....	3
3.5.	Engineering Properties	3
4.0	INSTALLATION NOTES.....	3
4.1.	Pipeline Support.....	3
4.2.	CPVC Solvent Cement Joints.....	4
4.3.	Thermal Fusion Joints	4
4.4.	Personal Safety with High Temperatures.....	4
4.5.	Cold Temperatures.....	5
