

**INSPECTION OF PLASTIC PIPES,
FITTINGS AND JOINTS
USING
NON-DESTRUCTIVE TEST METHODS AND
EVALUATION
(NDT/ NDE)**

TN-60

2019

Foreword

This technical note was developed and published with the technical help and financial support of the members of the Plastics Pipe Institute (PPI). These members have shown their commitment to developing and improving quality products by assisting standards development organizations in the development of standards, and also by developing design aids and reports to help engineers, code officials, specifying groups, contractors and users.

The purpose of this technical note is to provide information regarding the use of non-destructive testing and/or evaluation (NDT/NDE) technologies for the inspection of plastic pipe and fitting fusion joints.

The PPI has prepared this technical note as a service to the industry. The information in this report is offered in good faith and believed to be accurate at the time of its preparation, but is offered “as is” without any express or implied warranty, including WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Additional information may be needed in some areas, especially with regard to unusual or special applications. Consult the manufacturer or material supplier for more detailed information. A list of member manufacturers is available on the PPI website. PPI does not endorse the proprietary products or processes of any manufacturer and assumes no responsibility for compliance with applicable laws and regulations.

PPI intends to revise this technical note within five years or sooner if required, from the date of its publication, in response to comments and suggestions from users of the document. Please send suggestions of improvements to the address below. Information on other publications can be obtained by contacting PPI directly or visiting our website. The Plastics Pipe Institute, Inc.

Table of Contents

1.0	INTRODUCTION	1
2.0	CURRENT NDE METHODS FOR FUSION JOINTS.....	1
2.1.	Visual.....	2
2.2.	Bead Assessment.....	2
2.3.	Data Recording Devices	2
2.4.	Hydrostatic Pressure Testing prior to Start-up.....	3
3.0	INDUSTRY RESEARCH	3
4.0	NDT/ NDE CONSIDERATIONS for the USER	3
4.1.	Detection Capabilities and Confidence Levels.....	4
4.2.	Joint Type Limitations.....	4
4.3.	NDT Inspector Qualification.....	4
4.4.	Evaluation Procedures	5
4.5.	Establishing Acceptance Criteria	6
5.0	SUMMARY	6
6.0	BIBLIOGRAPHY.....	7
