

R-VALUE AND THERMAL CONDUCTIVITY OF CROSSLINKED POLYETHYLENE (PEX) AND POLYETHYLENE OF RAISED TEMPERATURE (PE-RT) TUBING

PPI TR-48

2025

Foreword

This technical report was developed and published with the technical help and financial support of the members of the Plastics Pipe Institute (PPI). These members have shown their commitment to developing and improving quality products by assisting standards development organizations in the development of standards and also by developing design aids and reports to help engineers, code officials, specifying groups, contractors and users.

The purpose of this technical report is to report the test results for thermal conductivity and “R-value” of crosslinked polyethylene (PEX) tubing and polyethylene of raised temperature resistance (PE-RT) tubing.

The PPI has prepared this technical report as a service to the industry. The information in this report is offered in good faith and believed to be accurate at the time of its preparation but is offered “as is” without any express or implied warranty, including WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Additional information may be needed in some areas, especially with regard to unusual or special applications. Consult the manufacturer or material supplier for more detailed information. A list of member manufacturers is available on the PPI website. PPI does not endorse the proprietary products or processes of any manufacturer and assumes no responsibility for compliance with applicable laws and regulations.

PPI intends to revise this technical report within five years, or sooner if required, from the date of its publication in response to comments and suggestions from users of the document. Please send suggestions for improvements to the address below. Information on other publications can be obtained by contacting PPI directly or visiting our website.

This Technical Report, TR-48, was first issued in August 2014 and republished in April 2025.

TABLE OF CONTENTS

Foreword	2
Table of Contents	3
List of Tables	3
1.0 Introduction	4
2.0 Objective	4
3.0 Testing	5
4.0 Results and Conclusions	5
Appendix	7

LIST OF TABLES

Table 1: R-Value of SDR9 PEX tubing per Nominal Tubing Size	5
Table 2: Thermal Conductivity of PEX, PE-RT, and Copper Tubing	6
Table 3: Testing Results at 73°F (23°C)	7
Table 4: Testing Results at 140°F (60°C)	7
Table 5: Testing Results at 180°F (82°C)	7
