Engineering Requirements for Dispatch of Trains from Platforms

Part 1 Purpose and Introduction

1.1 Purpose

- 1.1.1 This document mandates the engineering requirements for the equipment used in the dispatching of passenger trains from platforms.

1.2 Introduction

1.2.1 Background

- 1.2.1.1 This document applies to the following equipment and facilities:

- a) Indicators required for train dispatch
- b) Platform-mounted mirrors
- c) Station-mounted cameras and monitors
- d) Station-mounted cameras and train-mounted monitors.

- 1.2.1.2 All the methods listed in 1.2.1.1 apply to DOO(P) but are not exclusive to DOO(P).

1.2.2 Related requirements in other documents

- 1.2.2.1 The following Railway Group Standards contain requirements that are relevant to the scope of this document:

GE/RT8000 Rule Book

GE/RT8037 Signal Positioning and Visibility

GI/RT7016 Interface between Station Platforms, Track and Trains

GK/RT0045 Lineside Signals, Indicators and Layout of Signals

- 1.2.2.2 Where co-operation is required by this document between the infrastructure manager and railway undertakings in the design of new equipment or changes to the equipment or facilities provided for train dispatch, the process for co-operation is set out in GE/RT8270 Assessment of Compatibility of Rolling Stock and Infrastructure.

1.2.3 Supporting documents

- 1.2.3.1 The following documents support this Railway Group Standard:

GE/GN8560 Guidance on Engineering Requirements for Dispatch of Trains from Platforms
