Rail Industry Standard for Compatibility of Rail Vehicle Couplings and Interconnectors

Issue record

Issue	Date	Comments
One	December 2014	Original document Replaces GM/RT2190 issue three and GM/GN2650 issue one and provides requirements and guidance on the compatibility of rail vehicle couplings and interconnectors. This reflects changes in regulation in that it is the responsibility of transport operators, when placing a vehicle into service, to demonstrate compatibility and limitations of use, as set out in Railways (Interoperability) Regulations 2011.

Superseded or replaced documents

The following Railway Group documents are superseded or replaced, either in whole or in part as indicated:

Superseded documents	Sections superseded	Date when sections are superseded
GM/RT2190 issue three, December 2010, Compatibility Requirements for Rail Vehicle Couplings and Interconnectors	All	March 2015
GM/GN2650 issue one, December 2010, Guidance on Vehicle Interconnector and Coupling Compatibility	All	March 2015

GM/RT2190 issue three and GM/GN2650 issue one cease to be in force and are withdrawn as of 07 March 2015.
