Bibliography - Lossy Filters

The following bibliography on lossy filters for use on electrical and electronic systems was prepared by the Lossy Filter Subcommittee AE-4C.2 of the Society of Automotive Engineers. The bibliography is in chronological sequence and is oriented toward the use of lossy materials to attenuate radio frequency noise on transmission lines.

The Chairman of the Lossy Filter Committee is Mr. M. Malinick, and the members are Mr. A. J. Blakely, Mr. D. E. Clark, Mr. S. A. Jensen, Mr. B. H. Showalter, Mr. G. G. Sundberg, and Mr. S. Branceleone.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.
