PRESSURE DIE CAST AIRCRAFT WHEELS AND BRAKES -
QUALITY EVALUATION

OCTOBER 1, 1949

PREPARED BY

Committee A-5, Aircraft Wheels, Brakes and Axles

SOCIETY OF AUTOMOTIVE ENGINEERS, INC.
29 West 39th Street New York, N. Y.

Section 7C of the SAE Technical Board rules provides that: "All technical reports, including standards approved and practices recommended are advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. There is no agreement to adhere to any SAE standard or recommended practice, and no commitment to conform to or be guided by any technical report. In formulating and approving technical reports, the Board and its Committees will not investigate or consider patents which may apply to the subject matter. Prospective users of the report are responsible for protecting themselves against liability for infringement of patents."

PRESSURE DIE CAST AIRCRAFT WHEELS AND BRAKES - QUALITY EVALUATION

INTRODUCTION

The aircraft wheel and brake manufacturers have a need for information on the processes and procedures followed in the production of pressure die cast aircraft wheels and brakes. They also have a need for a common understanding of the factors to be considered in determining the quality of aluminum and magnesium pressure die castings for aircraft wheels and brakes. This report has been prepared as a means of making available to industry and government personnel this desired information.

SOCIETY OF AUTOMOTIVE ENGINEERS, Inc.

Committee A-5, Aircraft Wheels, Brakes and Axles

W. H. DuBois, Chairman
Bendix Aviation Corp.

Pierce Hammond
