

AEROSPACE INFORMATION REPORT

AIR6170™**REV. B**

Issued 2012-01
Revised 2017-02
Cancelled 2022-10

Superseded by AS6170

Ice Melting Test Method for Runways and Taxiways
Deicing/Anti-Icing Chemicals

RATIONALE

This SAE Aerospace Information Report AIR6170 does not fit the definition of an AIR document; therefore, it is cancelled and superseded by the SAE Aerospace Standard document AS6170, which contains specific test methods and protocols. The new SAE Aerospace Standard document contains additional information on the preparation of reference control solutions. The new document also incorporates some editorial changes.

CANCELLATION NOTICE

This Technical Report has been declared "CANCELLED" as of October 2022 and has been superseded by AS6170. By this action, this document will remain listed in the respective index, if applicable. Cancelled Technical Reports are available from SAE.

SAE Executive Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.
