

AEROSPACE MATERIAL SPECIFICATION

AMS7284™/2

REV. A

Issued 1990-07
Reaffirmed 2001-04
Cancelled 2016-05

Superseding AMS7284/2

Rings, Sealing, Phosphonitrilic Fluoroelastomer (FZ)
Aviation Fuel-Resistant
75 - 85 Shore A

RATIONALE

This document was for a polymeric material that is no longer commercially available. Because this material had numerous applications for which there is no single substitution material, users must determine their own substitution for this material.

CANCELLATION NOTICE

This Technical Report has been declared "CANCELLED" as of May 2016. By this action, this document will remain listed in the respective index, if applicable. Cancelled Technical Reports are available from SAE.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

1. SCOPE:

1.1 Form:

This specification covers phosphonitrilic fluoroelastomer (FZ) in the form of molded rings.

1.2 Application:

Primarily for use in aircraft fuel systems operating from -55° to +150°C (-67° to +302°F).

1.3 Classification:

Rings having a nominal hardness of 80 durometer Shore A, or equivalent.

2. APPLICABLE DOCUMENTS:

See AMS 7284.

3. TECHNICAL REQUIREMENTS:

3.1 Basic Specifications:

The complete requirements for procuring the sealing rings described herein shall consist of this document and the latest issue of the basic specification AMS 7284.

3.2 Properties:

Shall conform to the following requirements, determined in accordance with test methods listed in AMS 7284:
