

 AEROSPACE MATERIAL SPECIFICATION	AMS-QQ-A-200/16A	
	Issued	JUL 1997
	Cancelled	JUN 2007
Superseded by ASTM B 221		
Aluminum Alloy, Structural Shapes, Extruded, 6061		
A96061		

RATIONALE

AMS-QQ-A-200/16 has been cancelled and superseded because equivalent technical requirements are provided by ASTM B 221.

CANCELLATION NOTICE

This specification has been declared "CANCELLED" by the Aerospace Materials Division, SAE, as of June, 2007, and has been superseded by alloy 6061 of ASTM B 221. The requirements of the latest issue of ASTM B 221 for alloy 6061 shall be fulfilled whenever reference is made to the cancelled AMS-QQ-A-200/16. By this action, this document will remain listed in the Numerical Section of the Index of Aerospace Material Specifications, noting that it has been superseded by alloy 6061 of ASTM B 221.

Cancelled specifications are available from SAE.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.

Aluminum Alloy, Structural Shapes,
Extruded, 6061

A96061

NOTICE

This document has been taken directly from Federal Specification QQ-A-200/16A and contains only minor editorial and format changes required to bring it into conformance with the publishing requirements of SAE technical standards.

The original Federal Specification was adopted as an SAE standard under the provisions of the SAE Technical Standards Board (TSB) Rules and Regulations (TSB 001) pertaining to accelerated adoption of government specifications and standards. TSB rules provide for (a) the publication of portions of unrevised government specifications and standards without consensus voting at the SAE Committee level, (b) the use of the existing government specification or standard format, and (c) the exclusion of any qualified product list (QPL) sections.

The complete requirements for procuring aluminum alloy 6061 structural shapes, extruded, described herein shall consist of this document and the latest issue of AMS-QQ-A-200.

1. SCOPE AND CLASSIFICATION:

1.1 Scope:

This specification covers the specific requirements for aluminum alloy 6061 structural shapes produced by extrusion.

1.2 Classification:

Structural shapes shall be furnished in the -T6 temper (solution heat-treated and artificially aged) only (See 6.2 and 6.3). Definitions of tempers are specified in AMS-QQ-A-200.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.
