Safety Briefings for Passengers in Exit Rows

RATIONALE

This document is cancelled and the information contained therein is now incorporated into ARP1384.

CANCELLATION NOTICE

This technical report has been declared "CANCELLED" as of June 2023 and has been superseded by ARP1384. By this action, this document will remain listed in the respective index, if applicable. Cancelled technical reports are available from SAE.

SAE Executive Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

1. SCOPE

This SAE ARP provides guidance for (1) ensuring passenger suitability for being seated in an exit row and (2) the standardization of safety briefings for passengers, seated at exits, who may be responsible for opening exits on transport airplanes during an emergency. This recommendation is primarily for briefing passengers seated in the Type III overwing exit row, but may be applied to briefing passengers responsible for other exit types. In addition, these recommendations pertain to briefings on airplanes on which the flight attendants would conduct the exit row briefing, *and* to briefings on airplanes without flight attendants, on which pilots would conduct the briefing.
