

AEROSPACE STANDARD	AS7112™/4	REV. A
	Issued 1997-12 Cancelled 2017-06	
	Superseded by PRI AC7112/4	
National Aerospace and Defense Contractors Accreditation Program Requirements for Hose/Tube Assembly		

RATIONALE

AS7112/4A is being cancelled and superseded by PRI AC7112/4.

CANCELLATION NOTICE

This document has been declared "CANCELLED" as of June 2017 and has been superseded by PRI AC7112/4. By this action, this document will remain listed in the Numerical Section of the Aerospace Standards Index noting that it is superseded by PRI AC7112/4. Cancelled specifications are available from SAE.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

1. SCOPE:

This Aerospace Standard (AS) is to be used as a supplement to SAE AS7112. In addition to the requirements contained in AS7112, the requirements contained herein shall apply to suppliers seeking NADCAP Fluid System Components Accreditation for Hose Assembly.

Hose/tube assemblies may be qualified as being comprised of bulk qualified hose/tube and fittings. The purpose of this standard is to define requirements for audit qualification of the hose/tube assembly to an "assembly" procurement/performance specification. It addresses the fabrication of two or more components coupled by means of screwing, bolting, welding, brazing, swaging or crimping together to form an assembly to meet performance criteria - qualification.
