Gary,

For 2016 MY, General Motors will introduce the Cadillac CTS Sedan V-Series with the LT4 engine. This is the same Regular Production Option (RPO) LT4 engine previously SAE certified via witness testing for the 2015 MY Chevrolet Corvette. The restriction levels of the CTSv application have been reflected in the attached SAE power rating. The SAE rating was generated from the 2015 Corvette LT4 via isopower per the torque and horsepower plots shown below.

Please also note that this information is being restricted as far as release to the public until after December 22, 2014.
