Gary,

For the 2016 Model Year, General Motors will introduce the Chevrolet Camaro with the Regular Production Option (RPO) LT1 engine. This is the same RPO LT1 engine previously SAE certified via witness testing for the 14 MY Chevrolet Corvette. The induction restriction and backpressure levels in the Camaro vary slightly from those of the Corvette and have been reflected in the attached SAE power rating. The SAE rating was derived from the 2014 Corvette LT1 engine via isopower per the horsepower and torque plots shown below.

Let me know if you have questions or require anything further in order to process this application for certification.

Thanks,
