

TECHNICAL REPORT

GEIA-STD-0002-1

REV. A

Issued 2005-08
Stabilized 2015-03

Aerospace Qualified Electronic Component (AQEC) Requirements, Volume 1 - Integrated Circuits and Semiconductors

RATIONALE

This document has been determined to contain basic and stable technology which is not dynamic in nature.

STABILIZED NOTICE

This document has been declared "Stabilized" by the SAE APMC Avionics Process Management Committee and will no longer be subjected to periodic reviews for currency. Users are responsible for verifying references and continued suitability of technical requirements. Newer technology may exist.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

GEIA STANDARD

Aerospace Qualified Electronic Component (AQEC) Requirements, Volume 1 – Integrated Circuits and Semiconductors

GEIA-STD-0002-1

August 2005

**GOVERNMENT ELECTRONICS AND
INFORMATION TECHNOLOGY ASSOCIATION**

A Sector of the Electronic Industries Alliance

NOTICE

GEIA Engineering Standards and Publications are designed to serve the public interest by eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of GEIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than GEIA members, whether the standard is to be used either domestically or internationally.

Standards and Publications are adopted by GEIA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, GEIA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard or Publication.

This GEIA Standard is considered to have International Standardization implications, but the ISO/IEC activity has not progressed to the point where a valid comparison between the GEIA Standard and the ISO/IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(From Standards Proposal No. GEIA-STD-0002-1, formulated under the cognizance of the Avionics Process Management Committee (APMC).)

Revision	Description of change	Date
-	Initial Release	8/05

Contents

ACKNOWLEDGMENT	ii
FOREWORD	iii
1 SCOPE	1
2 INFORMATIVE REFERENCES	2
3 TERMS AND DEFINITIONS	2
4 REQUIREMENTS	3
4.1 AQEC Plan	3
4.2 AQEC Documentation	4
4.2.1 AQEC Data Sheet	4
4.2.2 Material Content	4
4.2.3 AQEC Visibility	4
4.2.4 AQEC Life Expectancy	4
4.2.5 Device Technology	5
4.2.6 Termination Finish	5
4.2.7 Third party part numbers	5
4.3 AQEC Performance	5
4.3.1 Performance	5
4.3.2 Functional Parameters	5
4.3.3 Known Limitations	5
4.4 Quality System Certification	5
4.5 Component Qualification and Requalification	5
4.6 AQEC Quality Assurance and Reliability Monitoring	6
4.7 Product Change Notification (PCN)	6
4.8 Last Time Buy (LTB) Notification	6
4.9 Obsolescence Management	6
Appendix A: AQEC Material Content and Construction Table	7
Appendix B: Additional Desired Data	8

ACKNOWLEDGMENT

The GEIA G-12 Solid State Devices Committee and the GEIA Avionics Process Management Committee acknowledge the significant contributions of the authors and organizations whose efforts provided the foundation for this document. The Committees would like to recognize the principle contributors shown below and to extend gratitude to the many others who assisted in the evolution of this Standard.

<i>Name</i>		<i>Organization</i>
Vance	Anderson	Defense Microelectronics Activity
Brian	Brady	Avnet
Roy	Brown	Honeywell
Joe	Chapman	DSPO
Lloyd	Condra	Boeing
Michael	Cooper	General Dynamics
Tom	Davidson	US Army
Sandy	Ellyson	Linear Technology
John	Fink	Honeywell
Ken	Finney	Boeing
Jon	Fitch	Freescale Semiconductor
Mike	Gulliver	Smiths Aerospace
Tom	Hess	DSCC
Wes	Hubbell	Raytheon
Dave	Humphrey	Honeywell
Paul	Kelley	Northrop Grumman
Henry	Livingston	BAE Systems
Dave	Locker	US Army
Jitu	Modi	Northrop Grumman
Ray	Monnin	DSCC
John	Nirschl	Rockwell Collins
Brent	Rhoton	Texas Instruments
Bill	Scofield	Boeing
Al	Steel	Texas Instruments
Scott	Wagner	Rockwell Collins
Michael	Whelan	NAVAIR
