

TECHNICAL REPORT	GEIA-TB-0002™	REV. A
	Issued 2008-06 Stabilized 2019-08	
	Superseding GEIA-TB-0002	
System Configuration Management Implementation Template (Oriented for a U.S. Military Contract Environment)		

RATIONALE

This document remains valid for DoD programs and projects, with regards to Configuration Management (CM) activities to be performed over the lifecycle. Recommend it be stabilized via SAE terminology.

STABILIZED NOTICE

This document has been declared "Stabilized" by the SAE G-33 Configuration Management Committee and will no longer be subjected to periodic reviews for currency. Users are responsible for verifying references and continued suitability of technical requirements. Newer technology may exist.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

NOTICE

This document has been taken directly from the original TechAmerica document and contains only minor editorial and format changes required to bring it into conformance with the publishing requirements of SAE Technical Standards. The release of this document is intended to replace the original with the SAE International document. Any numbers established by the original document remain unchanged.

The original document was adopted as an SAE publication under the provisions of the SAE Technical Standards Board (TSB) Rules and Regulations (TSB 001) pertaining to accelerated adoption of specifications and standards. TSB rules provide for (a) the publication of portions of unrevised specifications and standards without consensus voting at the SAE committee level, and (b) the use of the existing specification or standard format.

GEIA-TB-0002

TechAmerica Engineering Bulletin

System Configuration Management Implementation Template

(Oriented for a US Military Contract Environment)

GEIA-TB-0002

June 2008

NOTICE

TechAmerica Engineering Standards and Publications are designed to serve the public interest by eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchasers in selecting and obtaining with minimum delay the proper product for their particular needs. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of TechAmerica from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than TechAmerica members, whether the standard is to be used either domestically or internationally.

Standards and Publications are adopted by TechAmerica in accordance with the American National Standards Institute (ANSI) patent policy. By such action, TechAmerica does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard or Publication.

Technical Publications are distinguished from TechAmerica Standards in that they contain a compilation of engineering data or information useful to the technical community and represent approaches to good engineering practices that are suggested by the formulating committee.

This Bulletin is not intended to preclude or discourage other approaches that similarly represent good engineering practice, or that may be acceptable to, or have been accepted by, appropriate bodies. Parties who wish to bring other approaches to the attention of the formulating committee to be considered for inclusion in future revisions of this publication are encouraged to do so. It is the intention of the formulating committee to revise and update this publication from time to time as may be occasioned by changes in technology, industry practice, or government regulations, or for other appropriate reasons.

(Formulated under the cognizance of the TechAmerica G-33 Configuration/Data Management Committee.)

Table of Contents

The contents of the Systems CM Implementation Template are internally self-organized in spreadsheet (table) format. The information contained therein does not reasonably lend itself to a detailed table of contents, and therefore one is not deemed necessary. See the template directly for the obvious organization of the information.

Acknowledgement

The GEIA G-33 Configuration/Data Management Committee sponsored a specialized, short-duration working group in June 2007 to address the subject of CM implementation aligned with the DoD's acquisition life cycle. The working group conceptualized, developed and finalized the document in accordance with the initiating charter. The working group quickly mobilized via in-person meetings in Denver and San Antonio in mid-to-late CY 2007; and via several teleconference collaboration phone calls to accomplish the approach and technical content reflected in this Bulletin.

Special acknowledgement goes to each of the following members of the working group:

Mr. Mitch Kaarlela	Lockheed Martin
Mr. Dwayne Hardy	DoD Systems Engineering Office
Mr. Jason Baggett	US Army
Mr. Jerry Baldwin	NASA
Ms. Marita Berg-Gustafsson	Ericsson
Ms. Deborah Cornelius	US Army
Mr. Tom Giblin	DRS S&TS Optronics
Mr. Dub Hosmer	SAIC
Ms. Krista Hovey	NASA
Ms. Cindy Hughes	US Air Force
Ms. Kim Johns	US Navy
Mr. Richard Lee	NASA
Mr. Jim Leonard	Lockheed Martin
Ms. Cindy McFerran	US Army
Mr. Robert Meinhart	US Army
Ms. Ellen Mondro	MatrixOne
Mr. David Mueller	US Navy
Mr. Chris Neubert	US Army
Mr. Don Noble	Lockheed Martin (retired)
Mr. Hal Noell	US Navy
Mr. Chuck Nunez	BAE SYSTEMS
Mr. Bob Ouellette	US Air Force
Ms. Christine Patrick	BAE SYSTEMS
Mr. Chris Ritchey	US Army
Mr. Chris Sautter	Univ of Alabama-Huntsville
Ms. Judy Sparger	Boeing
Mr. Jeff Thau	BIO-Key
Mr. Sherman Weatherspoon	IBM
Mr. Phil West	Raytheon

Foreword

This Government Electronics & Information Technology Association (GEIA) Bulletin was prepared by a specialized working group of industry and government Configuration Management (CM) practitioners under the sponsorship of the G-33 Configuration/Data Management Committee. The working group was chartered to accomplish a short-duration task and document the results in a simple-to-understand format. See the System CM Implementation Template contained herein for those results. The actual spreadsheet is attached hereto, if any of the native data in the included table is needed for other reasons.

Important Notice Regarding Future Updates!

The working group acknowledges in advance that additional relevant input and guidance will be thought-of, discovered, identified or otherwise determined while this bulletin is in its first formal ballot review and continuing for at least a couple of years after it is first published. In other words, when advancing the state-of-the-art in an area such as this, the first iteration will by no means be the last word on the subject. The working group plans to batch process suggestions received between publishing dates, and consider reopening an update to the bulletin approximately once per year for the first two (2) years, and then plan to address suggestions and comments thereafter on an as-needed basis. Your comments and suggestions are welcomed, but please recognize our need to batch process them to best use our limited personnel resources.
