Marine Control Cable Connection - Engine Throttle Lever

RATIONALE

This standard covers an older remote control cable design. Although still manufactured for older controls, it has not changed in many years and is a candidate for stabilization.

STABILIZED NOTICE

This document has been declared "STABILIZED" by SAE Marine Technical Steering Committee and will no longer be subjected to periodic reviews for currency. Users are responsible for verifying references and continued suitability of technical requirements. Newer technology may exist.

SAE Executive Standards Committee Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

1. SCOPE

The purpose of this SAE Recommended Practice is to provide guides toward standard conditions for operating marine engine throttles (gasoline or diesel) where push-pull cable control is applicable.

For control cable information see SAE J917.
