AMERICAN NATIONAL STANDARD

ANSI/SCTE 243-1 2017

**Next Generation Audio Carriage Constraints for Cable
Systems: Part 1 – Common Transport Signaling**

NOTICE

The Society of Cable Telecommunications Engineers (SCTE) / International Society of Broadband Experts (ISBE) Standards and Operational Practices (hereafter called “documents”) are intended to serve the public interest by providing specifications, test methods and procedures that promote uniformity of product, interchangeability, best practices and ultimately the long-term reliability of broadband communications facilities. These documents shall not in any way preclude any member or non-member of SCTE•ISBE from manufacturing or selling products not conforming to such documents, nor shall the existence of such standards preclude their voluntary use by those other than SCTE•ISBE members.

SCTE•ISBE assumes no obligations or liability whatsoever to any party who may adopt the documents. Such adopting party assumes all risks associated with adoption of these documents, and accepts full responsibility for any damage and/or claims arising from the adoption of such documents.

Attention is called to the possibility that implementation of this document may require the use of subject matter covered by patent rights. By publication of this document, no position is taken with respect to the existence or validity of any patent rights in connection therewith. SCTE•ISBE shall not be responsible for identifying patents for which a license may be required or for conducting inquiries into the legal validity or scope of those patents that are brought to its attention.

Patent holders who believe that they hold patents which are essential to the implementation of this document have been requested to provide information about those patents and any related licensing terms and conditions. Any such declarations made before or after publication of this document are available on the SCTE•ISBE web site at <http://www.scte.org>.

Table of Contents

Title	Page Number
NOTICE	2
Table of Contents	3
1. SCOPE	5
2. Normative References	5
2.1. Standards from Other Organizations	5
3. Informative References	5
4. Compliance Notation	6
5. Abbreviations and Definitions	6
5.1. Abbreviations	6
5.2. Definitions	6
6. Introduction	7
6.1. Audio Preselection Information	7
6.2. Carriage of NGA	7
6.3. Audio Specific Capabilities	8
7. Signaling of NGA codecs in MPEG-2 TS	8
7.1. Audio Preselection Information	8
7.1.1. audio_preselection_descriptor	8
7.1.2. Usage of the audio_preselection_descriptor	9
7.2. Emergency Information	9
7.2.1. Introduction	9
7.2.2. emergency_information_descriptor	10
7.3. Accessibility Information	11
7.4. Example of descriptors usage in PMT	12
8. Signaling of NGA codecs in MPEG DASH	13
8.1. Background and Basic Use Cases	13
8.2. Assumptions and Definitions	13
8.3. Codec-Independent Mapping to DASH	13
8.4. Codec-specific Properties	13
