
SMPTE STABLE DOCUMENT

The attached SMPTE Engineering Document has been declared “Stable” by the controlling Technology Committee.

The SMPTE Operations Manual for Standards states:

A document should be stabilized if it is believed to be substantially correct, does not contain harmful or misleading recommendations, may still be relevant to equipment or practices in use, is stable, but does not represent current technology, and need not be subject to future reviews.

A Stable document shall still be made available and offered for sale by the Society, but it shall be prefaced by a cover page explaining its current status.

At any time, a Technology Committee may revise, amend, or otherwise initiate a new Project on a Stable document.

A Stable document is “In Force”, and not deprecated or withdrawn.

*** * * * ***

Note:

SMPTE “Stable” documents were previously described as “Archived” and the attached document may be marked as “Archived”. The status of a SMPTE document described as “Archived” is exactly as described above for a “Stable” document.

Stable documents may not adhere to the latest style and format of SMPTE documents, or to current usage of normative language. Suitable care should be taken in interpretation.

SMPTE RECOMMENDED PRACTICE

RP 148-1987

Relative Polarity of Stereo Audio Signals

1 Scope

This practice recommends the relative polarity of the signals of the two audio channels of stereo television magnetic tape recorders for the purpose of stereo program exchange.

2 Relative polarity

For stereo program material, the relative polarity of the audio signals at the inputs to a stereo television magnetic tape recorder shall be such that any monophonic component of the program shall have the same polarity in the magnetic records of both channels.
