Sufentanil Citrate Injection

DEFINITION

Sufentanil Citrate Injection is a sterile solution of Sufentanil Citrate in Water for Injection. It contains the equivalent of NLT 90.0% and NMT 110.0% of the labeled amount of sufentanil citrate ($C_{22}H_{30}N_2O_2S \cdot C_6H_8O_7$).

[CAUTION—Handle Sufentanil Citrate Injection with great care, because it is a potent opioid analgesic.]

IDENTIFICATION

Change to read:

- A. ▲ [SPECTROSCOPIC IDENTIFICATION TESTS \(197\)](#), [Ultraviolet-Visible Spectroscopy: 197U](#) ▲ (CN 1-MAY-2020)

Sample solution: 50 µg/mL

Medium: Use *Mobile phase* prepared as directed in the Assay. [NOTE—For samples that do not require dilution to achieve 50 µg/mL, use Water for Injection as the medium for the *Standard solution*.]

Acceptance criteria: Meets the requirements

- B. The retention time of the major peak of the *Sample solution* corresponds to that of the *Standard solution*, as obtained in the Assay.

ASSAY

PROCEDURE

Mobile phase: Methanol, acetonitrile, and 0.13 M ammonium acetate (45:24:31). Adjust with glacial acetic acid or ammonium hydroxide to a pH of 7.2.

Standard solution: 0.075 mg/mL of [USP Sufentanil Citrate RS](#) in water

Sample solution: Use Sufentanil Citrate Injection.

Chromatographic system

(See [Chromatography \(621\)](#), [System Suitability](#).)

Mode: LC

Detector: UV 228 nm

Column: 4.6-mm × 25-cm; packing L1

Flow rate: 1.5 mL/min

Injection volume: 100 µL

System suitability

Sample: *Standard solution*

Suitability requirements

Tailing factor: NMT 2.0

Relative standard deviation: NMT 2.0%

Analysis

Samples: *Standard solution* and *Sample solution*

Calculate the percentage of sufentanil citrate ($C_{22}H_{30}N_2O_2S \cdot C_6H_8O_7$) in the portion of Injection taken:

$$\text{Result} = (r_U/r_S) \times (C_S/C_U) \times 100$$

r_U = peak response from the *Sample solution*

r_S = peak response from the *Standard solution*

C_S = concentration of [USP Sufentanil Citrate RS](#) in the *Standard solution* (mg/mL)

C_U = nominal concentration of sufentanil citrate in the *Sample solution* (mg/mL)

Acceptance criteria: 90.0%–110.0%

SPECIFIC TESTS

- [BACTERIAL ENDOTOXINS TEST \(85\)](#): NMT 6.25 USP Endotoxin Units/mL
- [pH \(791\)](#): 3.5–6.0
- [PARTICULATE MATTER IN INJECTIONS \(788\)](#): Meets the requirements for small-volume injections
- **OTHER REQUIREMENTS:** Meets the requirements in [Injections and Implanted Drug Products \(1\)](#).

ADDITIONAL REQUIREMENTS

- **PACKAGING AND STORAGE:** Preserve in single-dose or multiple-dose containers, preferably of Type I glass.
- [USP REFERENCE STANDARDS \(11\)](#).
