1. Scope

SUPPLIER's EMPLOYEE(S) is (are) an expert in geodesy, topography, positioning and surveying in marine, deep water, terrestrial or airborne domains. Such activities (henceforth referred to the POSITIONING WORK) are performed within more general exploration and production activities such as but not limited to seismic, drilling or construction (henceforth referred to the WORK). He (She) will be acting as positioning representative on behalf of the COMPANY to supervise and validate the POSITIONING WORK performed by CONTRACTOR.

The objectives of this Specification are:

- a) To set out the respective responsibilities regarding the POSITIONING WORK and the WORK.
- b) To set out the minimum requirements of SUPPLIER's EMPLOYEE(S) for the POSITIONING WORK.
- c) To provide a framework for the briefing, debriefing and reporting of the SUPPLIER's EMPLOYEE(S)

The overall objective is to ensure that CONTRACTOR provides good quality data in accordance with its Project Quality plan and with the Specifications contained in the CONTRACT between COMPANY and CONTRACTOR (henceforth referred to the CONTRACT), in the most cost efficient and safe manner. SUPPLIER's EMPLOYEE(S) shall refer to the CONTRACT, the Specifications contained within and any international documents to which it may make reference.

This Specification is to be used in conjunction with the other documents referred to in section 2 as well as the COMPANY Project Specification.

2. Reference documents

The reference documents listed below shall be considered by SUPPLIER's EMPLOYEE(S), as an integral part of this General Specification. Unless otherwise stipulated, the applicable version of these documents, including relevant appendices and supplements, is the latest revision published at the EFFECTIVE DATE of the CONTRACT between COMPANY and SUPPLIER.

All documents referred to in this section shall be considered as the latest versions and it shall be SUPPLIER's responsibility to ensure that SUPPLIER is in possession of these particular documents and that any qualifications are valid.

Standards

Reference	Title
ISO/TS 29001	Quality management system requirements for the design, development, production, installation and service of products for the petroleum, petrochemical and natural gas industries, based on ISO 9001:2000

Professional Documents

The SUPPLIER's EMPLOYEE(S) shall adhere to the following documents and ensure that they are available on the POSITIONING WORK location and fully understood by positioning CONTRACTOR and especially by the senior survey staff.

Reference	Title
UKOOA Guidelines	Guidelines for the Measurement of Quality and Basic Quality Control of Offshore Positioning Data, published by the UKOOA Survey and Positioning Committee, June 1992
UKOOA Guidelines	Guidelines for the Use of Differential G.P.S. in Offshore Positioning published by the UKOOA Survey and Positioning Committee, September 1994
UKOOA Guidelines	Guidelines for the use of DGPS for offshore surveying. Guidelines documents published by UKOOA in October 1994
UKOOA P2/94	Recommended format for recording of raw offshore navigation data which is an extension of the existing P2/91 format with additional records for raw GPS data and associated pseudo-range corrections
