1. Scope

This specification defines the equipment required to provide a Closed Circuit Television (CCTV) monitoring system on offshore and onshore installations.

The verbal forms used to indicate levels of requirement are specified in [ISO/IEC Directives, Part 2](#) and [Characteristics of good requirements](#), INCOSE symposium 1996.

The Contractor shall produce all documents listed in COMPANY specification [GS EP TEL 700](#).

2. Reference documents

The reference documents listed below form an integral part of this General Specification. Unless otherwise stipulated, the applicable version of these documents, including relevant appendices and supplements, is the latest revision published at the EFFECTIVE DATE of the CONTRACT.

This specification refers to the regulations, codes and standards as detailed hereafter.

The latest revision of these documents, in force at the time of contract signature, shall apply, even if this specification refers to an earlier issue.

The order of precedence of reference documents shall be the following:

- Laws, codes and rules of the country where the project takes place,
- COMPANY specifications,
- Rules and regulations set down by bodies recognized by the United Nations Organization (U.N.O.),
- Briefs, reports, recommendations and publications issued by international and European consultative committees such as: ITU, IEC, CENELEC.
