B.3 - Section 3 - Summary relative to the WHOLE rake of hauled vehicles.....	7
Bibliography	8

Summary

UIC Leaflet 472 has been completely redrafted by a UIC group working on the Modernisation of Infrastructure Leaflets. It deals with one of the key aspects of interoperability and is an essential tool for simplifying operational procedures at borders or handover points. This new version was particularly overdue, as the last update came out in 1981, well before the extensive changes that have affected the European railway landscape since that time. The contents of this leaflet could also serve as a basis for a train consist standard that could be annexed to the Operations TSI (under the section on freight train consist lists).
