Technical specification for the supply of elastomer flange connections for intercommunicating gangways

*Spécification technique pour la fourniture des raccords d'intercirculation à bourrelets en élastomère
Technische Lieferbedingungen für Elastomerwülste für Wulstübergänge*

UNION INTERNATIONALE DES CHEMINS DE FER
INTERNATIONALER EISENBAHNVERBAND
INTERNATIONAL UNION OF RAILWAYS

Leaflet to be classified in Volumes:

V - Transport Stock

VIII - Technical Specifications

Application:

With effect from 1 July 1975

All members of the International Union of Railways

Record of updates

2nd edition, July 1975 and its Amendment of 1.7.77

3rd edition, January 2004 Retyped in FrameMaker

The person responsible for this leaflet is named in the UIC Code

Summary

This technical specification governs the supply of elastomer flange connections for the intercommunicating gangways of rolling stock.

1 - Purpose

This technical specification governs the supply of elastomer flange connections for the intercommunicating gangways of rolling stock.

1.1 - Carrying out of the contract

All necessary particulars for the carrying out of the contract, in particular those concerning point **2.2.7 - page 4**, must be stipulated in the order or its appended documents.

1.2 - Classification

One quality only.

1.3 - List of documents referred to in this specification

ISO 37, ISO 48, ISO 188, ISO 1431 (see Bibliography - page 15).
