Licensing & Training Standards

UK CAA Registered Training Facilities
Private Pilot Licence Aeroplanes, Helicopters and Seaplanes

Standards Document 30, Version 41

- **Please note that this document is for guidance purposes only.**

Introduction

The Aircrew Regulation in respect of Training Organisation requirements (Part-ORA) and Licensing requirements (Part-FCL) was implemented in the UK on 17th September 2012.

Prior to 17th September 2012 all training organisations wishing to deliver training towards the Private Pilot Licence (Aeroplanes) or (Helicopters) was required under JAR-FCL 1 or 2 to register as a 'Registered Training Facility' (RTF) with the Member State in which training was to take place. Under the transitional arrangements for RTFs training may continue to be delivered as described in the scope of their registration certificate until 7 April 2015. Should a change to the scope of the registration certificate be required the RTF will need to gain full approval under Part ORA as an Approved Training Organisation.

This document contains a list of RTFs registered with the UK CAA on 17th September 2012 for the delivery of training towards the Private Pilot Licence (Aeroplanes) and (Helicopters). The organisations are listed in Alphabetical order by Company or Person/ Sole Trader name.

Organisations wishing to offer training who were not registered by 17th September 2012 must gain approval under Part ORA.

Notes:

Finance

It should be noted that the CAA is not empowered to verify the financial viability of a Registered Training Facility. Registration does not imply any financial protection or guarantee that a registered facility's finances are adequate.

Some RTFs may require a lump sum payment in advance or may offer discounted rates where advanced payment is made. Students should give careful consideration to the financial risks involved in making such payments.

Medical Certification

A pilot licence will not be issued to any person who is not in possession of a valid medical certificate of the appropriate class. The CAA recommends strongly to prospective students that they ensure they meet the medical certification requirements for a PPL before committing themselves to any substantial expense in satisfying the licence issue requirements. EU regulations stipulate that all Part-FCL licences, ratings and certificates for an individual must be administered by one EASA State. Consequently the State that will issue licences to an individual is normally determined by where the student obtains their first medical certificate. The CAA cannot issue a Part-FCL licence to anyone unless their medical and licensing records are held by the CAA. If any pilot wishes to change his State of Licence Issue he must ensure that all of his medical and licensing records are transferred to the new State (and translated as required by that State) and all of his licences and certificates are re-issued by that State.

Declaration

This list is produced for information and does not in any way affect the content of any other document published or otherwise issued by the CAA or EASA.

If any of the information contained within this document is believed to be incorrect, incomplete or the school is believed to be no longer operating, or no longer at the aerodrome base location, kindly let us know via E-mail at LTSApprovals@caa.co.uk.

- For Approved and Type Rating training providers, please refer to Standards Document 31 www.caa.co.uk/fclstandards

For training outside of a EASA state, please review information on the EASA website at <http://www.easa.eu.int/home>
