

Approvals Support Document

Organisations conducting: Approved Courses of Flight and Ground Training

Document 31, Version 124

The Civil Aviation Authority approves courses of flying and ground training to be conducted by certain organisations as listed in this document.

- To gain approval for the conduct of a course for a Part-FCL Licence, Rating or Certificate the organisation must comply with the standards made mandatory by European legislation; specifically:
Regulation 216/2008; and
Regulation 1178/2011 as amended by Regulation 290/2012.
- To conduct a course for a UK National Licence, Rating or Certificate - (e.g. a Type Rating Course for the Rotorway Executive helicopter) - the organisation must comply with the requirements of the UK Air Navigation Order and CAP 804. In general, the UK national requirements will be equivalent to those laid down by European legislation. This is in order to ensure a similar level of oversight and to simplify the requirements for organisations wishing to hold approvals under both European and national rules.

NOTES:

Training Organisations outside the UK

With effect from 8th April 2012, any organisation that has its principal place of business located outside of the territories of the EASA Member States, is under the direct approval and oversight of the European Aviation Safety Agency. Further information can be located via: www.easa.eu.int

Any organisation that has its principal place of business located within the territory of an EASA Member State other than the UK, is under the approval and oversight of the Competent Authority of the country where the principal place of business is located.

Medical

The Authority strongly recommends that any prospective students ensure that they meet the medical requirements relevant to the qualification for which they are to train before committing themselves to any expense to train to satisfy the licensing requirements.

The UK CAA can only issue Part-FCL licences to applicants for whom it holds the medical and licensing records. Applicants whose medical and licensing records are held in another Member State must apply to the Competent Authority (NAA) of that State.

Declaration

The information in this document is produced for general information. It does not in any way affect or override the content of any CAP or other document issued by the Authority.
