

Subject 101

August 10, 2018

SUMMARY OF TOPICS

The following changes in requirements to the Standard for Leakage Current for Appliances, UL 101, are being proposed:

1. Proposed Revision To Paragraph 5.3.3 To Align With UL 101 Formal Interpretation

STP BALLOTS AND ALL COMMENTS DUE: September 10, 2018

For your convenience in review, proposed additions to existing requirements are shown underlined and proposed deletions are shown ~~lined-out~~.

1. Proposed Revision To Paragraph 5.3.3 To Align With UL 101 Formal Interpretation

RATIONALE

Proposal submitted by: Dr. Hugh Pratt, Crane Power Line Safety Organization

Based on the results of the recent Formal Interpretation request closing April 13, 2018, the following proposal is being made to clarify Paragraph 5.3.3.

PROPOSAL

5.3.3 The supply voltage is to be sinusoidal of 50Hz or 60Hz, without a DC component, adjusted to the first available of the following:

- a) The voltage specified for the leakage current test in the product standard;
- b) The voltage specified for the normal temperature test in the product standard; or
- c) Maximum rated voltage.
