UNDERWRITERS LABORATORIES INC.

AN INDEPENDENT NOT-FOR-PROFIT ORGANIZATION

TESTING FOR PUBLIC SAFETY

Underwriters Laboratories Inc., founded in 1894, is chartered as a not-for-profit organization without capital stock, under the laws of the State of Delaware, to establish, maintain, and operate laboratories for the examination and testing of devices, systems and materials to determine their relation to hazards to life and property.

A complete description of the organization, purposes, and methods of Underwriters Laboratories Inc. is given in a separate pamphlet entitled "TESTING FOR PUBLIC SAFETY."

The names of companies that have demonstrated an ability to produce products meeting UL requirements are published annually in the following Product Directories.

Automotive, Burglary Protection, and
Mechanical Equipment
Building Materials
Electrical Appliance and Utilization Equipment
Electrical Construction Materials
Fire Protection Equipment

Fire Resistance
Gas and Oil Equipment
Hazardous Location Equipment
Marine Products
Recognized Component
Supplements to Directories

The price list for these publications and ordering information may be obtained upon request from UL, Publication Stock, 333 Pfingsten Road, Northbrook, Illinois 60062.

A Catalog of UL Standards for Safety with costs and ordering information is also available from this office.

UL 1067, SECOND EDITION

Accompanying this transmittal notice is a copy of the second edition of UL 1067.

THIS EDITION OF THE STANDARD IS NOW IN EFFECT.

The requirements in this standard are substantially in accordance with UL's bulletin on this subject dated June 9, 1986. The bulletin is now obsolete and may be discarded.

Revised and/or additional pages may be issued from time to time. Subscribers to UL's services in the area covered by this standard will receive these revised and/or additional pages automatically. Others may receive such pages by subscribing to UL's subscription service for revisions. See UL's Catalog of Standards for Safety for a description of the revision subscription service, the cost of the service for this Standard, and ordering information.

A **PRODUCT INDEX** of UL Standards for Safety is also available. The index provides examples of the more than 3,000 individual products that fall within the scope of the more than 500 generic product categories covered by UL's Services and Standards for Safety. The index also includes an alphabetical listing of keywords of each title of each Standard. The price of the index is \$8.00.

To obtain a free copy of UL's Catalog or to order the Product Index contact any of UL's Offices. Telephone orders for UL's publications may be charged to your Visa or MasterCard account.

FOREWORD

A. This Standard contains basic requirements for products covered by Underwriters Laboratories Inc. (UL) under its Follow-Up Service for this category within the limitations given below and in the Scope section of this Standard. These requirements are based upon sound engineering principles, research, records of tests and field experience, and an appreciation of the problems of manufacture, installation, and use derived from consultation with and information obtained from manufacturers, users, inspection authorities, and others having specialized experience. They are subject to revision as further experience and investigation may show is necessary or desirable.

B. The observance of the requirements of this Standard by a manufacturer is one of the conditions of the continued coverage of the manufacturer's product.

C. A product which complies with the text of this Standard will not necessarily be judged to comply with the Standard if, when examined and tested, it is found to have other features which impair the level of safety contemplated by these requirements.

D. A product employing materials or having forms of construction differing from those detailed in the requirements of this Standard may be examined and tested according to the intent of the requirements and, if found to be substantially equivalent, may be judged to comply with the Standard.

E. UL, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party. The opinions and findings of UL represent its professional judgment given with due consideration to the necessary limitations of practical operation and state of the art at the time the Standard is processed. UL shall not be responsible to anyone for the use of or reliance upon this Standard by anyone. UL shall not incur any obligation or liability for damages, including consequential damages, arising out of or in connection with the use, interpretation of or reliance upon this Standard.

F. Many tests required by the Standards of UL are inherently hazardous and adequate safeguards for personnel and property shall be employed in conducting such tests.
