

JOINT CANADA-UNITED STATES
NATIONAL STANDARD

ANSI/CAN/UL 258:2025

STANDARD FOR SAFETY

Shutoff Valves for Trim and Drain
Purposes for Fire Protection

SCC FOREWORD

National Standard of Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

UL Standard for Safety for Shutoff Valves for Trim and Drain Purposes for Fire Protection, ANSI/CAN/UL 258

First Edition, Dated February 9, 2022

Summary of Topics

This revision of ANSI/CAN/UL 258 dated February 17, 2025 includes the following changes:

– Revisions to Clarify Requirements and Update Testing: [8.1](#), [13.1.1](#), [14.1](#), [18A.2](#), and [21.2](#); and

– Revisions to Address Requirements for Valve Accessories: [4.2](#), [8.3](#), [9.3](#), [9.4](#), and Section [18A](#)

Text that has been changed in any manner or impacted by ULSE's electronic publishing system is marked with a vertical line in the margin.

The new and revised requirements are substantially in accordance with Proposal(s) on this subject dated July 26, 2024 and November 22, 2024.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form by any means, electronic, mechanical photocopying, recording, or otherwise without prior permission of ULSE Inc. (ULSE).

ULSE provides this Standard "as is" without warranty of any kind, either expressed or implied, including but not limited to, the implied warranties of merchantability or fitness for any purpose.

In no event will ULSE be liable for any special, incidental, consequential, indirect or similar damages, including loss of profits, lost savings, loss of data, or any other damages arising out of the use of or the inability to use this Standard, even if ULSE or an authorized ULSE representative has been advised of the possibility of such damage. In no event shall ULSE's liability for any damage ever exceed the price paid for this Standard, regardless of the form of the claim.

Users of the electronic versions of UL's Standards for Safety agree to defend, indemnify, and hold ULSE harmless from and against any loss, expense, liability, damage, claim, or judgment (including reasonable attorney's fees) resulting from any error or deviation introduced while purchaser is storing an electronic Standard on the purchaser's computer system.

ANSI/CAN/UL 258:2025

Standard for Shutoff Valves for Trim and Drain Purposes for Fire Protection

First Edition

February 9, 2022

This ANSI/CAN/UL Safety Standard consists of the First Edition including revisions through February 17, 2025.

The most recent designation of ANSI/UL 258 as an American National Standard (ANSI) occurred on February 17, 2025. ANSI approval for a standard does not include the Cover Page, Transmittal Pages, Title Page, Preface or SCC Foreword.

This standard has been designated as a National Standard of Canada (NSC) on February 17, 2025.

INTRODUCTION

1 Scope	7
2 Components	7
3 Units of Measurement	8
4 Referenced Publications	8
5 Glossary	8

CONSTRUCTION

6 Valve Sizes	9
7 Rated Pressure	9
8 Materials	9
9 Opening Characteristics	9
10 Inlet and Outlet Threads and Other Attachment Means	9

PERFORMANCE

11 General	10
12 10-Day Moist Ammonia Air Stress Cracking Test	10
13 Dezincification Test of Brass Parts	11
13.1 General	11
13.2 Reagent	11
13.3 Samples	11
13.4 Method	12
14 Stress-Corrosion Cracking of Stainless Steel Parts	12
15 Elastomeric Parts Test (Except Gaskets)	13
16 Leakage Test	13
16.1 General	13
16.2 Seat leakage	13
16.3 Body leakage	13
17 Strength of Body Test	13
18 Mechanical Strength Test	14
18.1 Valves with handles	14
18.2 Valves with handwheels	14
18A Plastic or Other Nonmetallic Parts (Excluding Elastomers)	15

MANUFACTURING AND PRODUCTION TESTS

19 General	15
20 Production Leakage Test	16
